Other Publications

E-books and Educational Materials

The following materials are freely available on my website at: villelangen.com

1. Beginner’s Guide to R Programming (available in both Finnish and English)

Guide to R, RStudio, and RMarkdown, including Git version control and cluster computing at University of Turku.

2. Echo Guidebook (available in both Finnish and English)

Basics of echocardiography for medical residents.

3. Easily Import Custom Citation Styles into Zotero

Guide for importing custom citation styles into Zotero to meet journal-specific requirements.

4. Easy Flowchart Creation with Free yEd Software

Tutorial with text and video on creating professional flowcharts using free yEd software.

5. Effortlessly Borrow and Read E-Books from a Library on Your E-Ink Device

Guide for reading library e-books (e.g., University of Turku’s Volter library) on e-ink devices like PocketBook.

6. Seamless Transition: Importing Mendeley References to Zotero Made Easy

Guide for transferring reference libraries from Mendeley to Zotero.

7. The Lightning Fast Git Guide

Guide to using Git for research repositories on home computers and University of Turku servers (available in English).

8. How to Run Macros in Microsoft Word

Tutorial on running macros in Word, with example for highlighting Track Changes revisions in red (macOS, with Windows workflow).

9. Unlocking IPCW Analysis in R: A Step-by-Step Tutorial (in Finnish)

Step-by-step guide to performing inverse-probability-of-censoring weighting (IPCW) survival analyses in R.

10. VPN Article Search and Reference Management Tutorial for University of Turku Researchers

Guide to using University of Turku VPN service and PubMed for article access, plus reference management basics (in Finnish).

11. 5-Minute Guide to Publishing Code on Zenodo

Quick guide for archiving GitHub repositories on Zenodo with citable DOI for journal submissions and long-term preservation.

12. How to Build a Zero-Cost Academic Homepage Using Open-Source Tools

30-minute guide to creating an academic website using Hugo, HugoBlox, GitHub, and Netlify with free hosting.

13. Writing GitBooks Tutorial

Tutorial on creating GitBook-style e-books with RStudio and bookdown, generating web pages, EPUB, and PDF from a single source.

14. GitHub Without Tears: From Zero to Push in Minutes

30-minute beginner tutorial covering GitHub installation, setup, and essential commands for academic projects.

15. Finishing your scientific text — pre-review checklist (available in both Finnish and English)

Short checklist for final manuscript preparation before submission for review.

16. Divergent Git Branches — From Problem to Solution

Guide to resolving divergent Git branches with three practical methods.

17. Step-by-Step Guide with Example Videos for Creating R Packages

Tutorial on R package development using devtools, usethis, and roxygen2, with accompanying video examples.

Audiovisual Learning Materials

Available on www.youtube.com/@vlangen

Platform for lectures and supplementary materials to accompany written tutorials and guides.

Development Work

Available on GitHub: https://github.com/vljlangen

• **PubMed Abstract Listing Fetcher** – Desktop application that converts a plain-text reference list into one continuous HTML document of PubMed-matched abstracts, primarily for dissertation preliminary examiners and manuscript reviewers. Open-source Electron app with HTML, PDF, and plain-text export.
• **AffiliWizard: Author-Affiliation Formatting Tool** – GUI application that transforms Excel author-affiliation data into properly formatted academic paper listings with automatic numbering and multiple export formats. Free desktop applications for Macintosh and Windows available on GitHub. Online Version: For immediate use without downloads: https://affiliwizard.netlify.app/
• **atctools: R Package for ATC Code Matching and Validation** – R package designed for facilitating Anatomical Therapeutic Chemical (ATC) matching and ensuring the integrity of ATC data in pharmaceutical datasets.
• **tablestylizer: R Package for Styling and Formatting Tables** – R package that provides functions for styling and formatting tables, making them publication-ready with enhanced visual appeal and clarity.
• **Flowchart Creation Web App** – Web application for generating inclusion-exclusion flowcharts from plain-text input, with support for branching and adjustable spacing.

Dissemination of Works

Personal Website (villelangen.com)

All materials listed in this publication list (except recently submitted ones) are presented with links on my personal website, which I created and maintain using Hugo markup language.

Abstracts

[1] H. Wistrand, N. E. Kaartinen, P. Jousilahti, T. J. Niiranen, and V. Langén. "The Association of 24-Hour Urinary Sodium Excretion with Inflammatory Cytokines". In: *J Hypertens* 42.1 (May 2024). 33rd European Meeting on Hypertension and Cardiovascular Renal Protection (ESH), Berlin, Germany, 31 May–3 June 2024, e246. ISSN: 0263-6352. DOI: 10.1097/01.hjh.0001022000.11216.3c.
